Suzhou Landmark Elevator Co., Ltd.
Elevator & Escalator

COMPANY PROFILE

Landmark Elevator, as a professional elevator and escalator manufacturer over years, sells to many countries and wins recognition of foreign clients. Landmark and has complied with all the national elevator and escalator with ISO quality certification. Landmark has technical experts with great experience to provide outstanding before-sales and after-sales service.

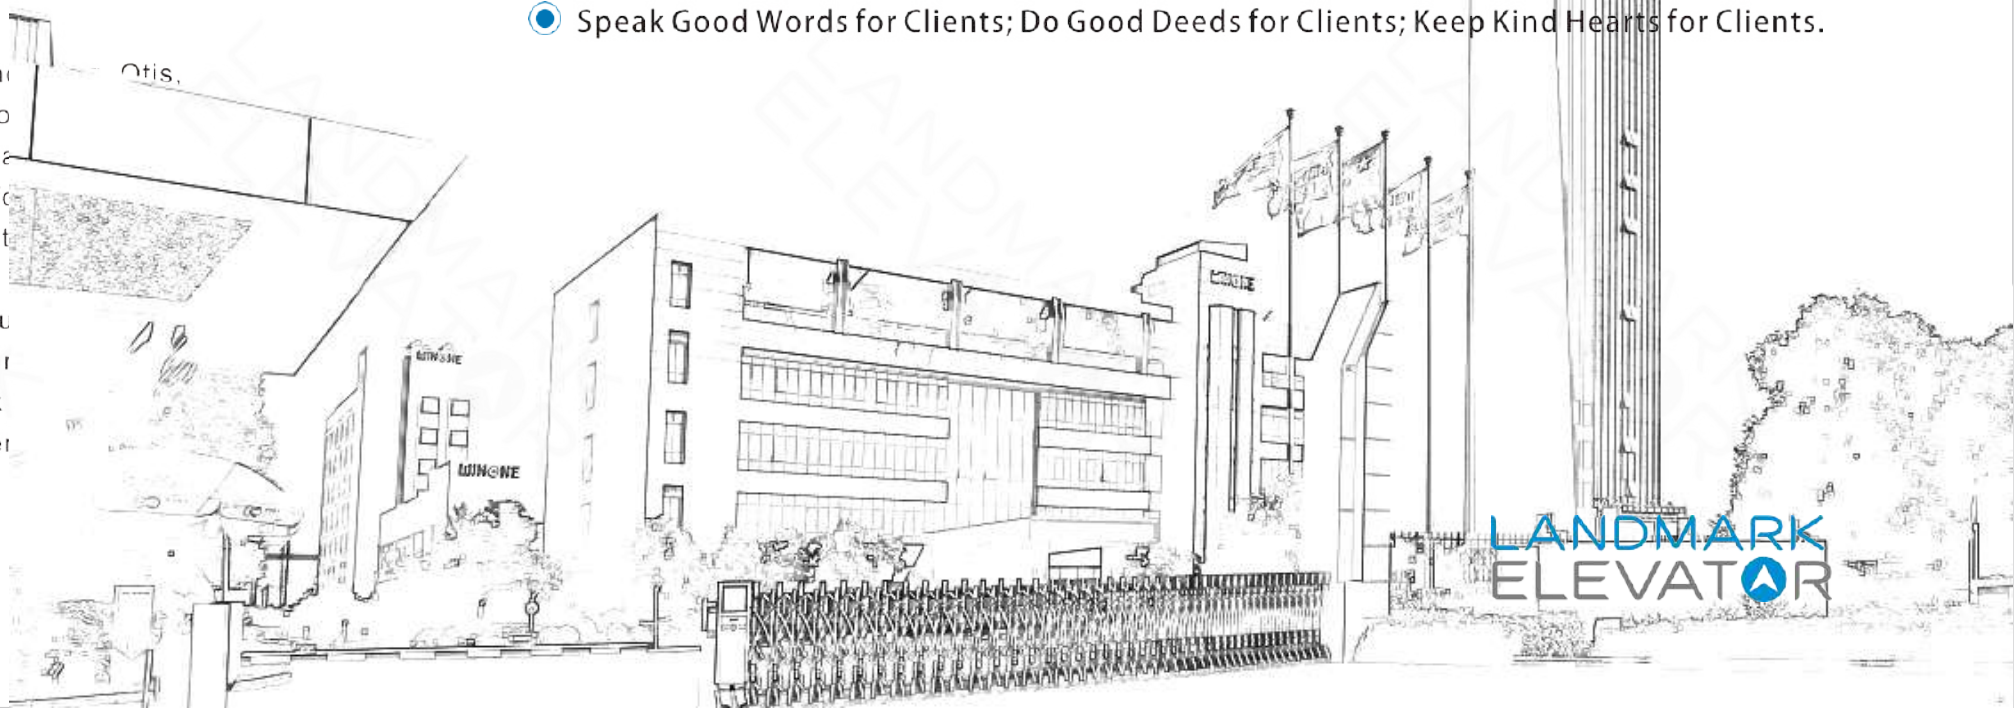

Landmark specializes in the supply of elevator package parts solution for new elevator, including machine, controller, door, safety parts and some mechanical items. Landmark also provides the regularly replaced parts for elevator maintenance and repair work, including door sensor, limit switch, photoelectric switch, door inverter, door motor, electrical inverter, main board etc. All these parts can be used for all brands of elevators including the brand elevator and escalator parts, like OTIS, SIGMA LG, Hyundai, KONE, Mitsubishi, etc.

Landmark focuses on the old elevator and escalator modernization job, in Otis, Mitsubishi, Thyssen etc all brands. It is a good economic option to modernize the old to make the passenger and the Owners happy with the elevator service. Landmark's professional technical teams follow up all the technical details, especially the before and after-sales technical evaluation to ensure the quality of parts and success of elevator modernization.

Landmark principle is "Customer-Oriented" & "Market-Oriented". We care about your interest and shall take full responsibility for all the works we do for our clients. Our goal to serve the clients in a better way is always fulfilled by all our staff. Landmark makes contributions in elevator service field for our clients and makes a fine cooperation with clients from all over the world.

Suzhou Landmark Elevator Co., Ltd.

- Vision: Leading Vertical Transport Solution Supplier.
- Mission: Building a Safe & Smart World.
- Core Values: "Three-Goods for Clients".
- Speak Good Words for Clients; Do Good Deeds for Clients; Keep Kind Hearts for Clients.

PRODUCT INTRODUCTION

Passenger Elevator

Our passenger elevators help people reach the floors quickly, comfortably, safely, and run quietly which is especially important at night. We make elevators be integrated into the buildings, and try to help building owners to reduce cost for total elevator lifetime with excellent solutions.

Hospital Bed Elevator

Our hospital bed elevators have large capacity and wide opening doors to accommodate stretchers, beds and other medical equipment, precise levelling to allow easy access for wheelchairs.

Freight Elevator

Our freight elevators are specially designed for the transportation of cargoes, big door opening, spacious cabin, strong structure, to ensure safe and steady running when loading large cargoes and people. They are the best transportation machines for factories, warehouses, and malls etc.

Panoramic Elevator

Our panoramic elevators are generally running in open environments like shopping malls, hotels, office buildings etc. We have various of designs for cabins which are elegant and beautiful, attract people's attention greatly. Your buildings must reach a higher level with our panoramic elevators.

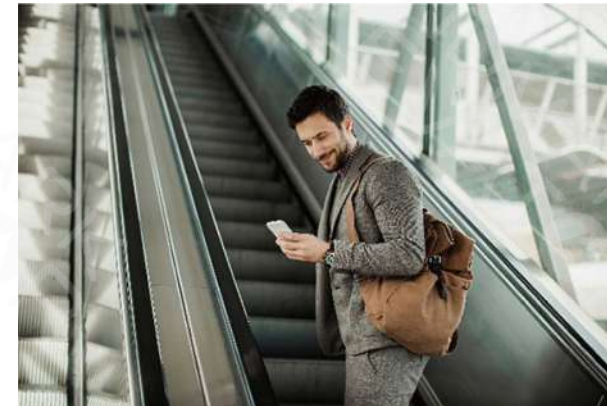

Home Elevator

With our home elevator solutions, you can bring your ideal vision to life. We have a variety of cabin designs, there is always one for you. Even no pit, or the space limited, we can design a matched home elevator for you.

Escalator

Our serial escalators use reliable materials and branded parts, with strong structure, to keep escalators smooth running for long time with lower noise and low-cost maintenance. They become indispensable part of shopping malls, multiplex cinema, museums, train and metro stations, airports etc.

Moving Sidewalk

Our moving sidewalks have strong structure and high performance as our escalators. When your site has small angle but long span, you can choose moving sidewalks. They are popular using in high-grade shopping center, airport, big indoor place etc.

PASSENGER ELEVATOR

Small Machine Room Passenger Elevator

255mm

Reduce the height of the machine room 255mm

40%

Small machine room elevator, save machine-room area

Machine Roomless Passenger Elevator

100%

Machine roomless elevator, pure utility of construction area

25%

It saves 25% of electric energy

B

HOME ELEVATOR

Home elevator is not only an elevator in your building, but also a taste of quality, which upgrades your home comfort and living quality. Our home elevator follows the design concept of "Quality, Taste, Customization, Profession", and applies advanced intelligent technology, to lift up your life of quality.

Shaft Frame

Circle internal and external glass structure

Semicircle external glass structure

Square external glass structure

Shaft glass color optional selection

Frosted glass

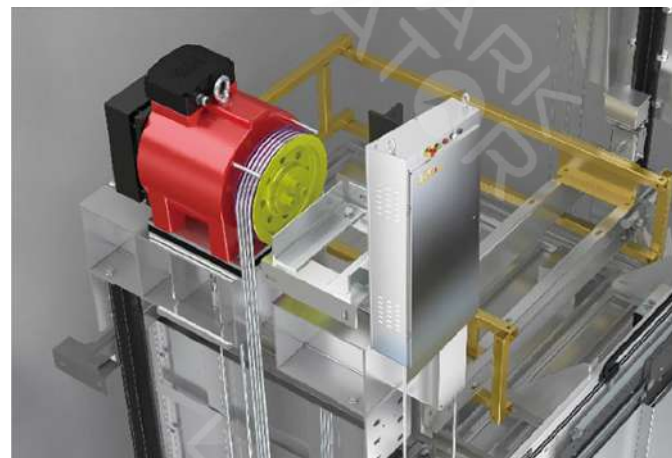

Transparent glass

Brown glass

Dark grey glass

Traction-type Home Elevator

It is no need of a dedicated machine room. It only takes a small area in shaft. It has low requirement from the overhead height and pit depth. It is suitable for various villa structures. It can run stably, without unbalanced load.

Steel Belt-type Home Elevator

It changes the traditional motor technology, and adopts the design with integrated drive and traction system. It is much more efficient in energy saving and environment protection. The flat steel belt is an advanced option.

Different Doors Of Home Elevator

Mirror stainless steel

Short hairline stainless steel (Anti-fingerprint)

Automatic glass door

Rose gold stainless steel

Rose gold mirror etching stainless steel

Titanium mirror etching stainless steel

Glass door with gold frame by hand

Glass door with by hand

FREIGHT ELEVATOR

Freight elevator is widely used in the workshop, office buildings to carry large heavy goods. Its loading capacity ranges from 1000kg to 10000kg.

Your Goods Transportation Expert

- The latest traction technology and the advanced driving and feedback technology are used to make the freight elevator run perfectly with comfort.
- Realize the precise and stable levelling with lower noise , and sturdy and durable use.
- Large door opening space, adopt multi-folding lift car door , to realize maximum width for door opening. It is convenient for large goods to enter and exit.

Side opening (This is for reference only.)

Side Opening

Car top: Painted steel
Ventilation: Circular fan
Car wall: Painted steel
Car door: Painted steel
Car floor: Chequered plate steel
Sill: Iron

ESCALATOR EIGHT SAFETY DESIGNS

1 Handrail entry protection

Safety protective device is installed at handrail entry. The escalator will stop running when unknown objects are clamped at handrail entry.

2 Step sagging protection

In order to guarantee the passengers' and equipment's safety, the escalator will stop running when the step is sagging or broken.

3 Drive chain protection

The escalator will stop running when the drive chains are overpulled or broken.

4 Anti-reversal protection

Speed and running direction sensors are installed at machineside. The machine will safety brake when the escalator makes non-operating reverse.

5 Step chain break protection

The escalator will stop running when the step chain is broken, overpulled or overshortened.

6 Comb plate protection

When unknown objects are placed in between moving steps and static comb plate, the safety switches installed to monitor two sides of comb plate will be activated, thus the escalator will stop running.

7 Emergency stop button

The escalator will stop running when the button is pressed.

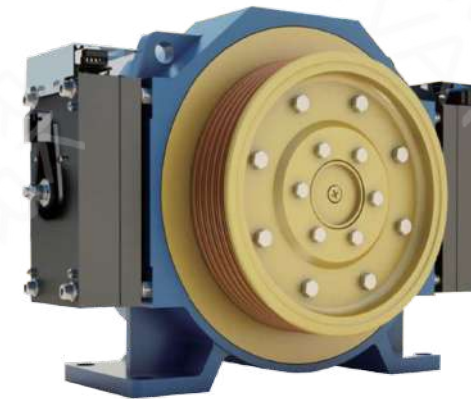

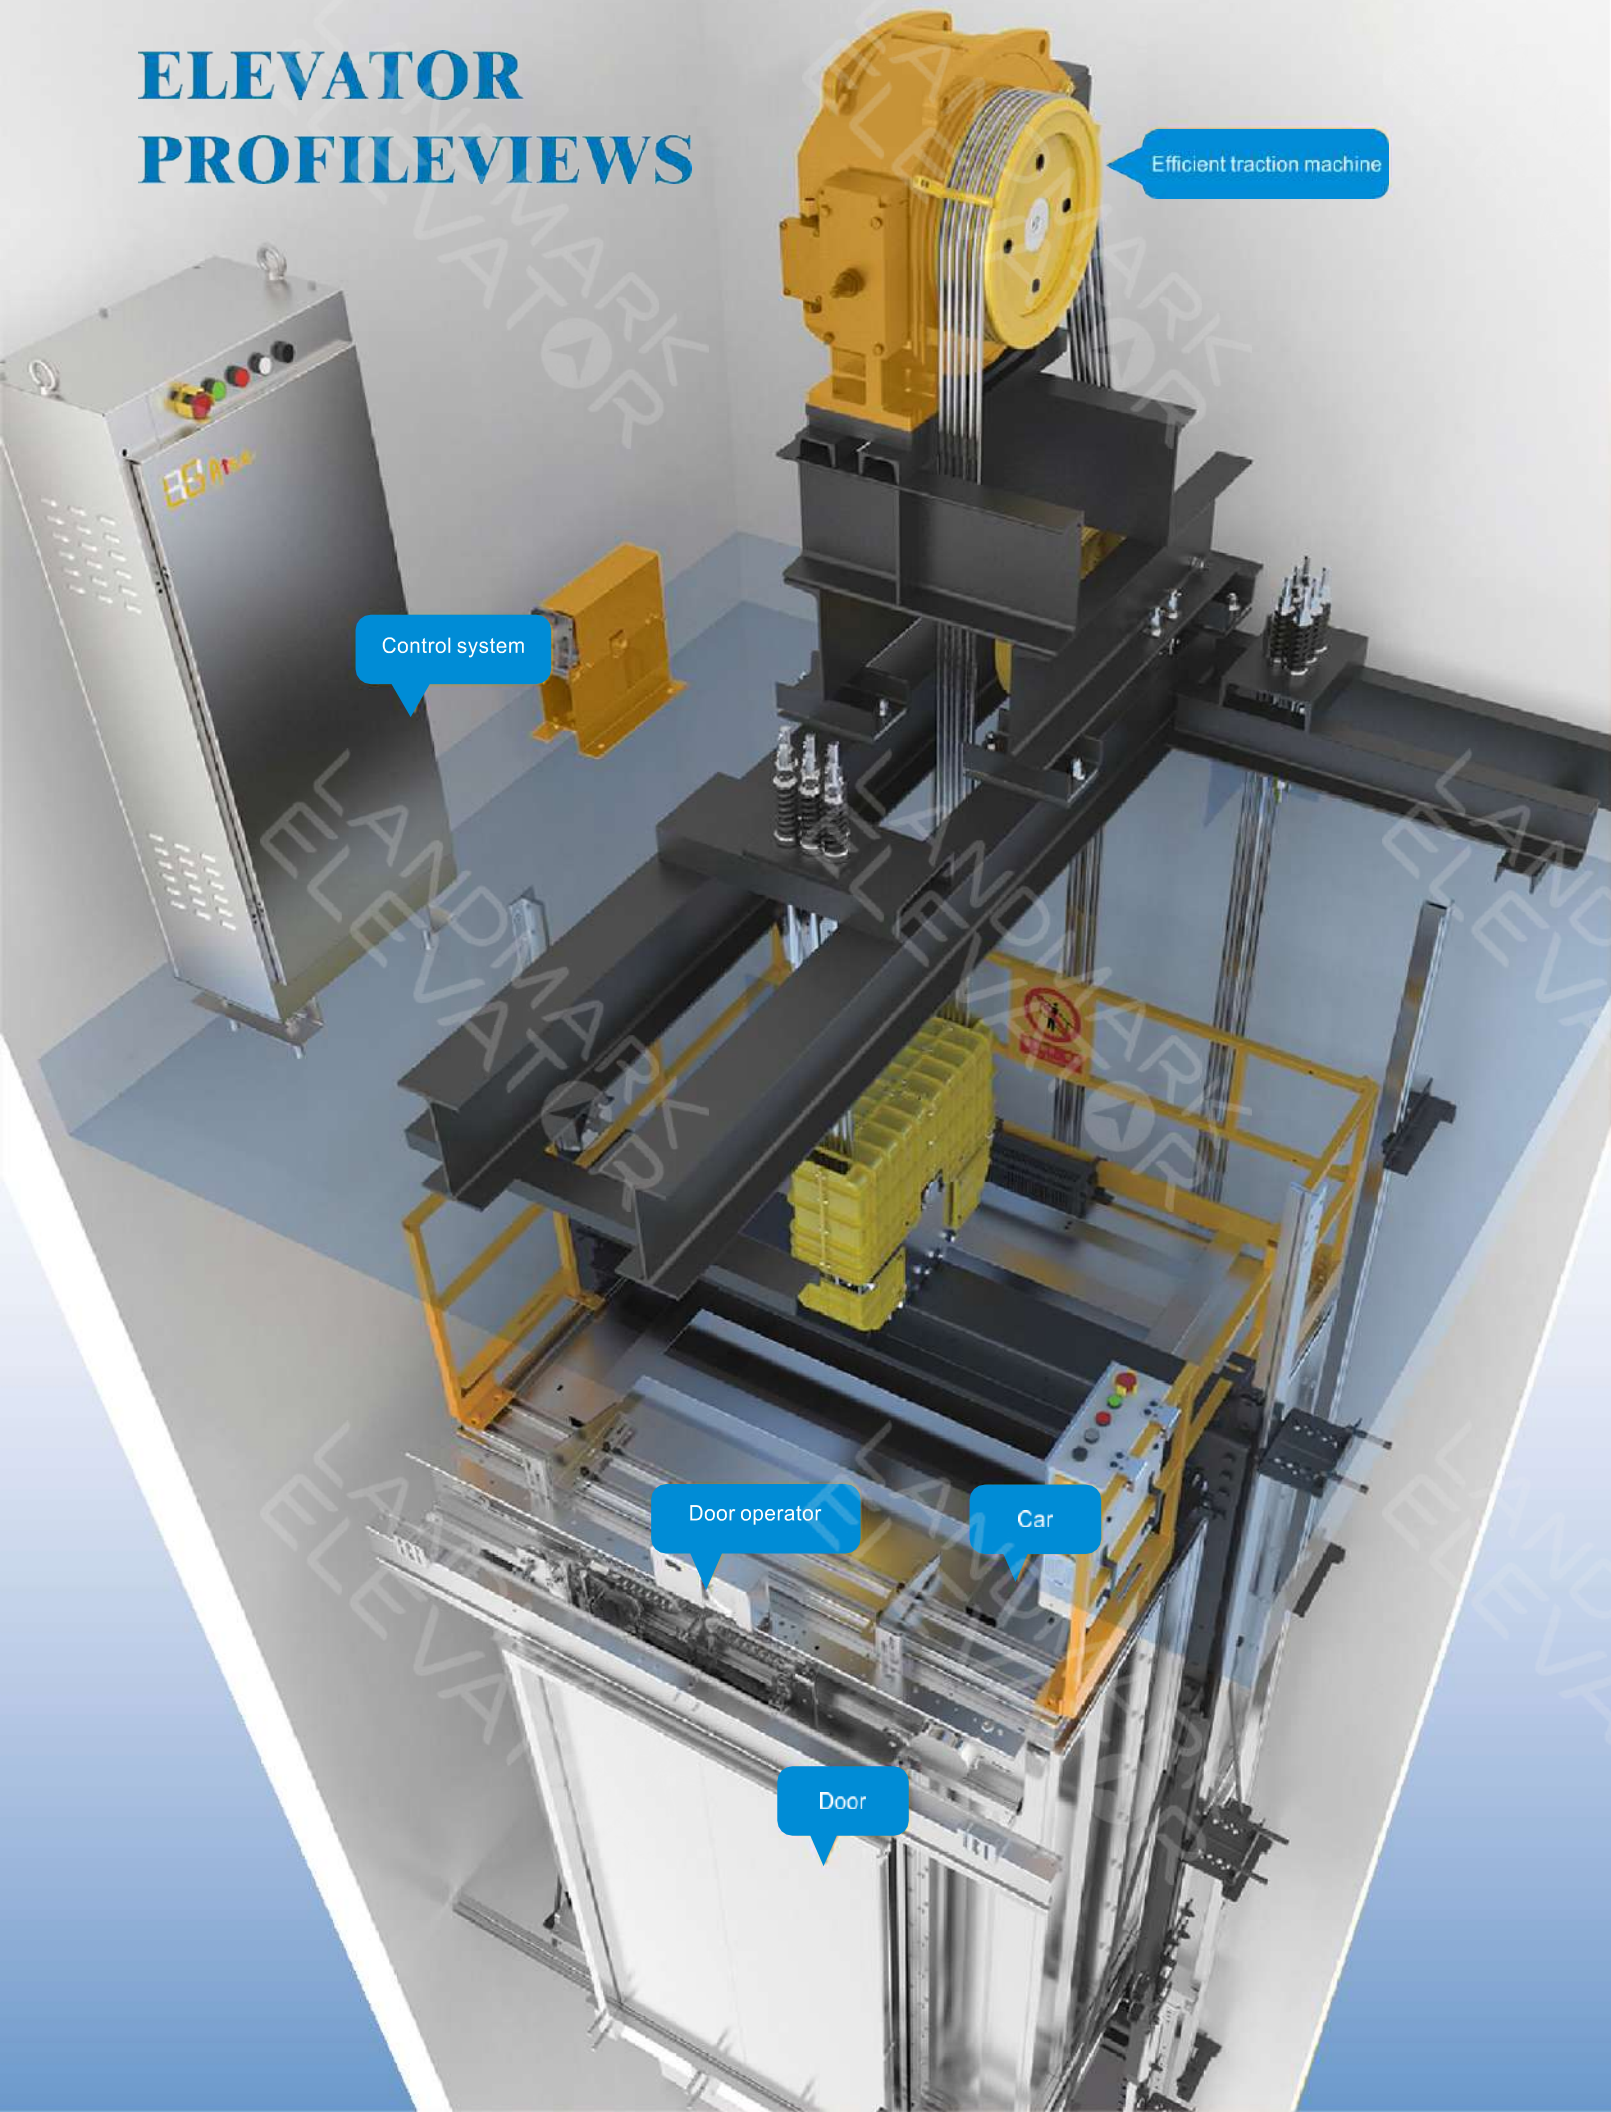

8 Landing plate opening protection device

The landing plate safety switch will be activated when landing plate is opened, which will cut off the safety circuit and the escalator stops running.

ELEVATOR PROFILEVIEWS

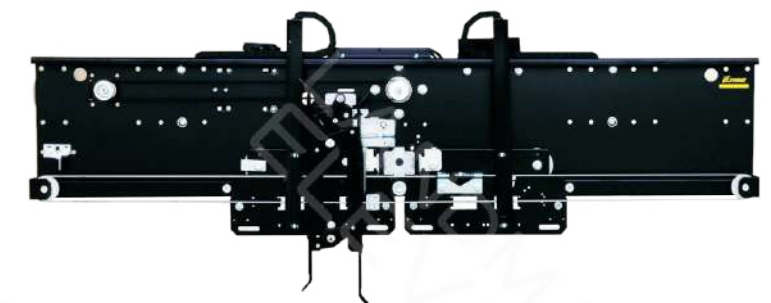

Permanent Magnet Synchronous Gearless Traction Machine

Landmark Elevator adopts the permanent magnet synchronous gearless machine with the latest technology. This machine is widely used now in all kinds of buildings, like offices, residential buildings, shopping mall,s hospitals, airports etc. It is suitable for machine room to machine room less.

New Control Technology

Landmark always develops the new series of control systems, to meet the high quality needs of the clients, and to win the market share. This integrated drive system makes the elevator perform quite easy with comfort and safety.

VVVF Door Operator

Landmark Elevator uses the new generation of VVVF synchronous door systems to make the door open and close more smoothly. The car door is equipped with infrared light curtain system for the door safety protection, to ensure the safety of the passengers.
